Technical Solutions Professional
Teams Voice Specialist

La telefonia in Teams

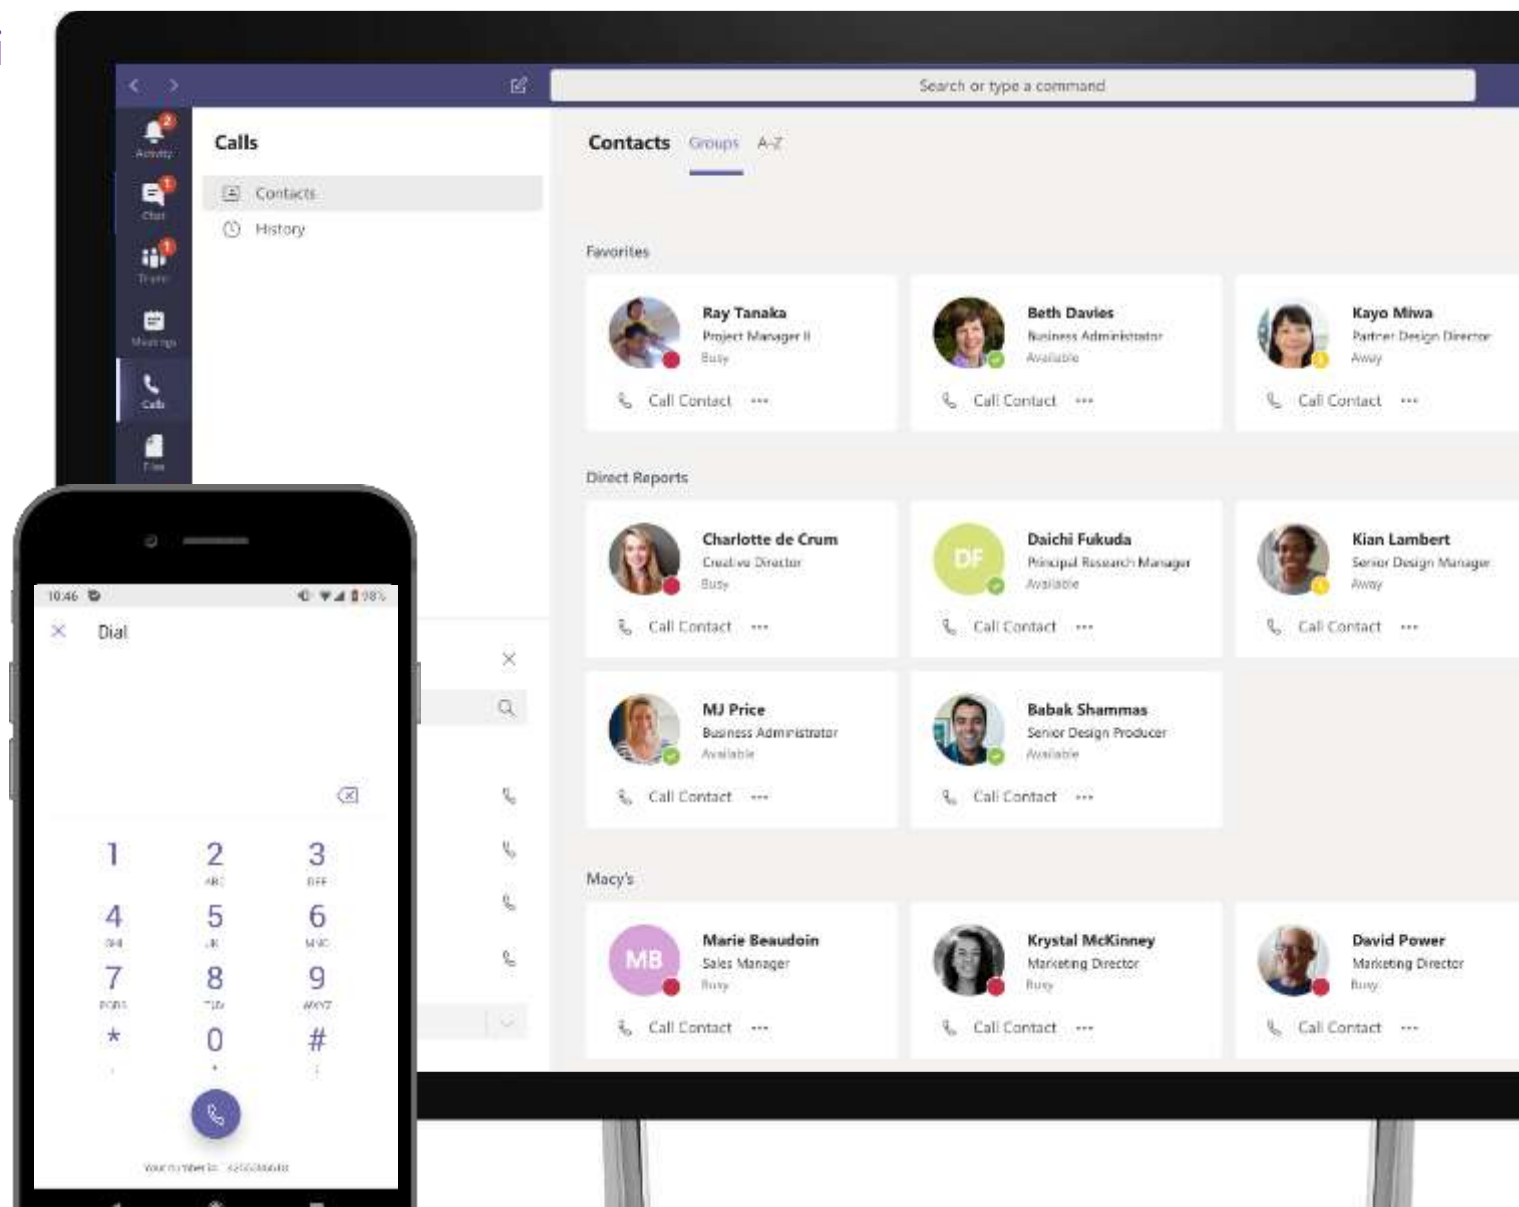

Comunica con chiunque attraverso i servizi di telefonia cloud

Fornisce il software, i servizi e le linee telefoniche per tutti gli utenti con i **Microsoft Calling Plan**

Mantieni le tue linee telefoniche (od integra con il tuo centralino) con **Microsoft Direct Routing**

Sfrutta le ultime funzionalità telefoniche come la **Cloud Voicemail**, i **Servizi telefonici evoluti** di delega, Busy on Busy, Auto Attendant, Call Park, Group Call Pickup e Shared Line Appearance

Funzionalità in **continua evoluzione** come Location-Based Routing, Dynamic e-911, and Call Recording

Phone System (Cloud PBX)

Servizi di centralino telefonico

Automated Attendant

Call answer / initiate (by name & number)

Call hold / retrieve

Call History

Call Delegation & Call On-behalf

Call Queuing & Routing

Call Transfer (Blind, Consult & Mobile)

Camp-on

Caller ID

Call Waiting

Call forwarding & simul-ring

Device switching

Distinctive ringing

Do-not-disturb routing & call blocking

Enterprise calendar call routing

Music on Hold

Qualified IP Desk Phones

Skype & Federated calling

Team calling

Video call monitor

Voice Mail with Transcription

...

La telefonia in Teams

I servizi di telefonia cloud

Audio Conferencing (Audioconferenza)

- Utilizza numeri locali telefonici (dial-in) per partecipare alle riunioni da qualunque dispositivo
- Aggiungi partecipanti alla riunione in corso, via telefono (dial-out)

Audio Conferencing

Phone System (Centralino telefonico)

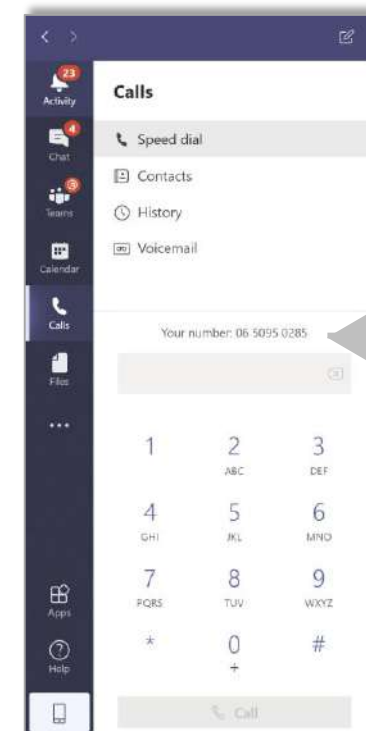

- Gestisci utenti centralmente da O365 per telefonia, email e contenuti
- Elimina il centralino telefonico PBX dedicato ed abilita la transizione verso il cloud

Direct Routing (SIP Trunk)

- Connetti il tuo TELCO Provider locale preferito
- Connetti ed integra il tuo centralino esistente

Calling Plan (Piani di chiamata)

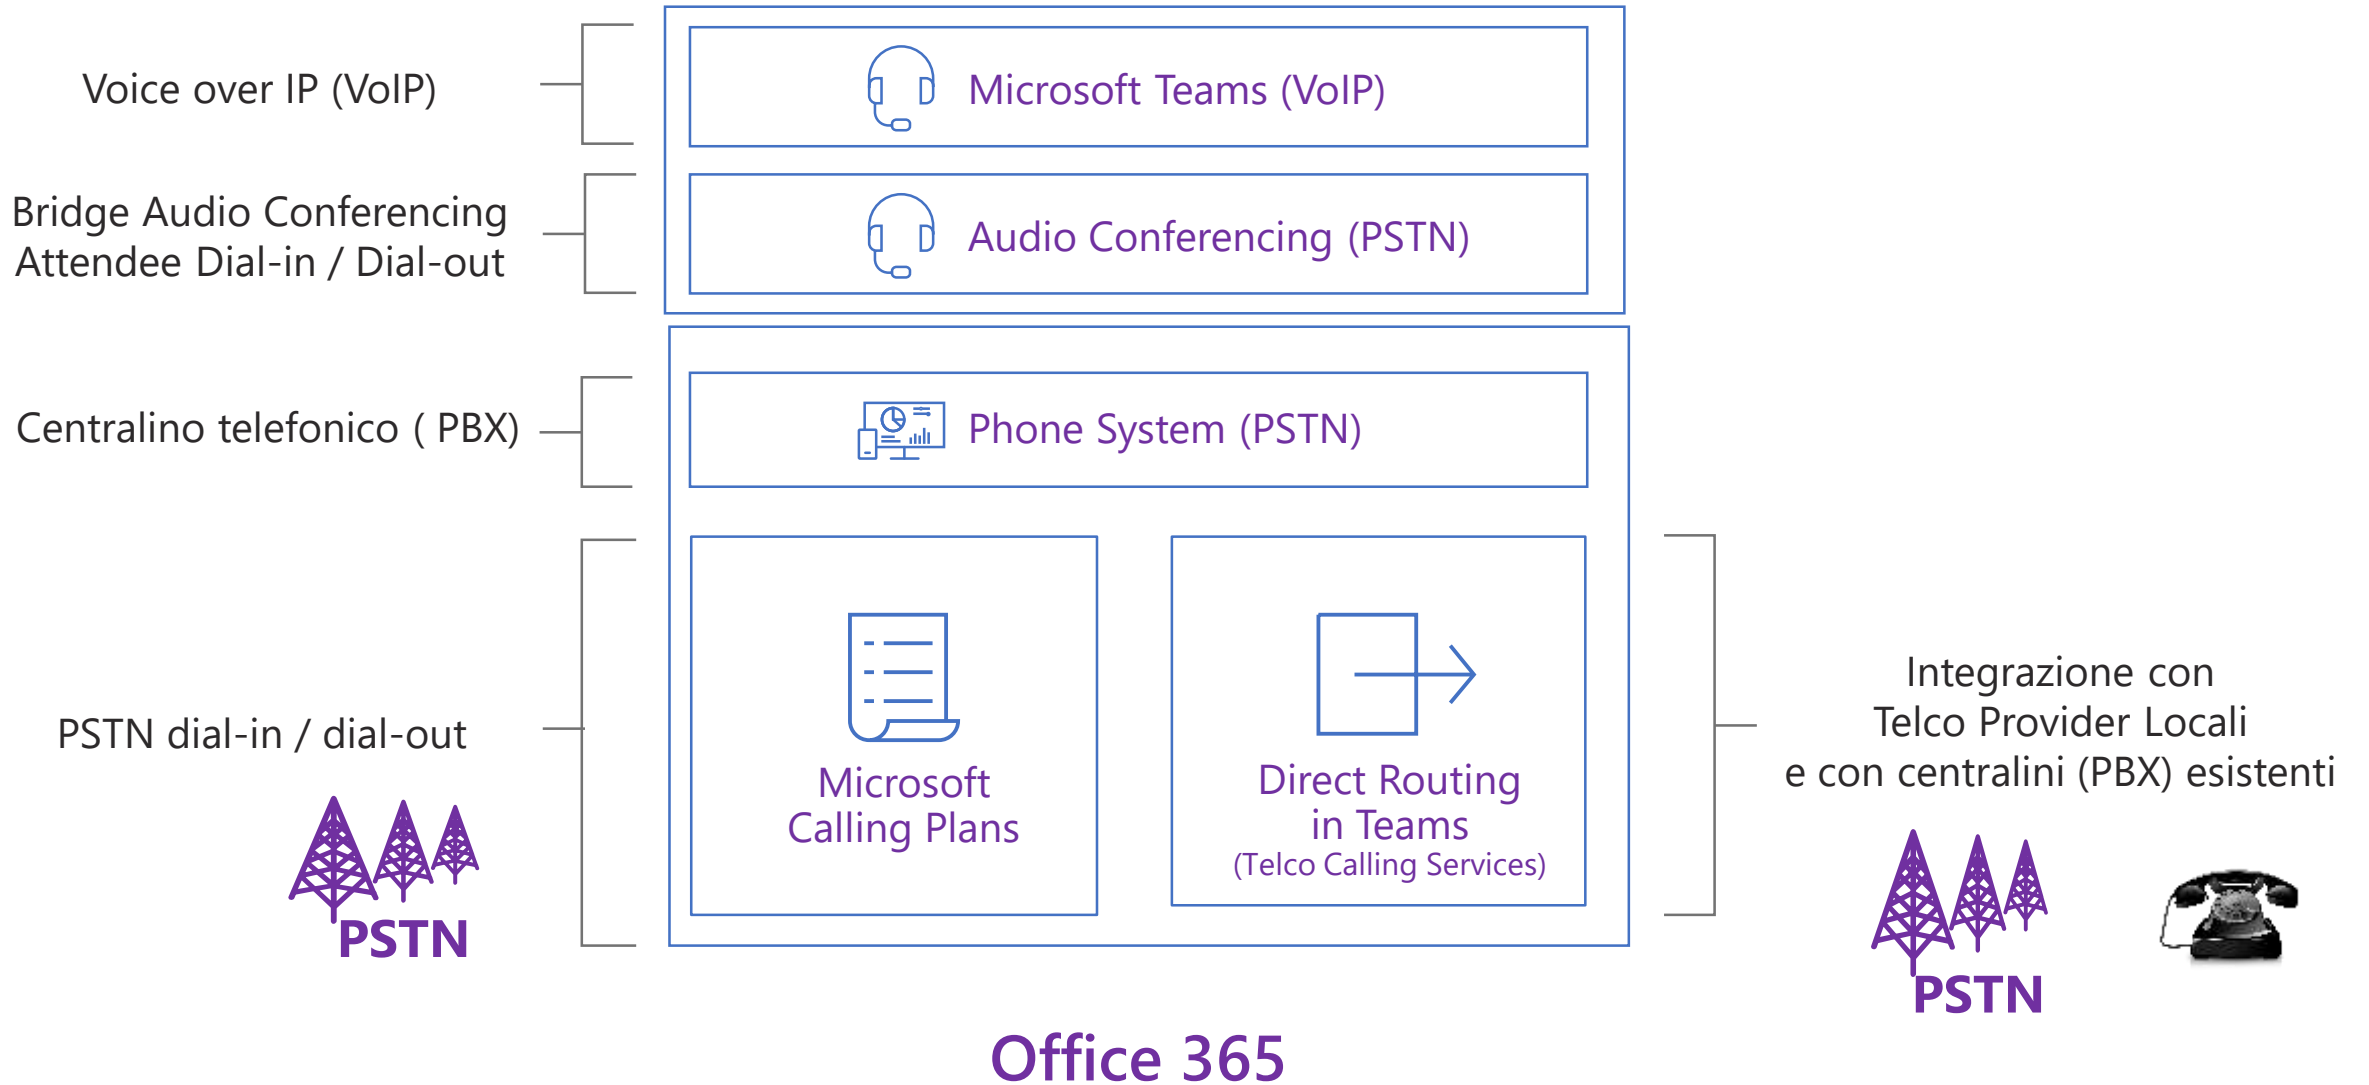

- Attiva i piani di chiamata in Office 365
- Attiva una nuova numerazione o richiedi la portabilità dei tuoi numeri

Phone System + Direct Routing

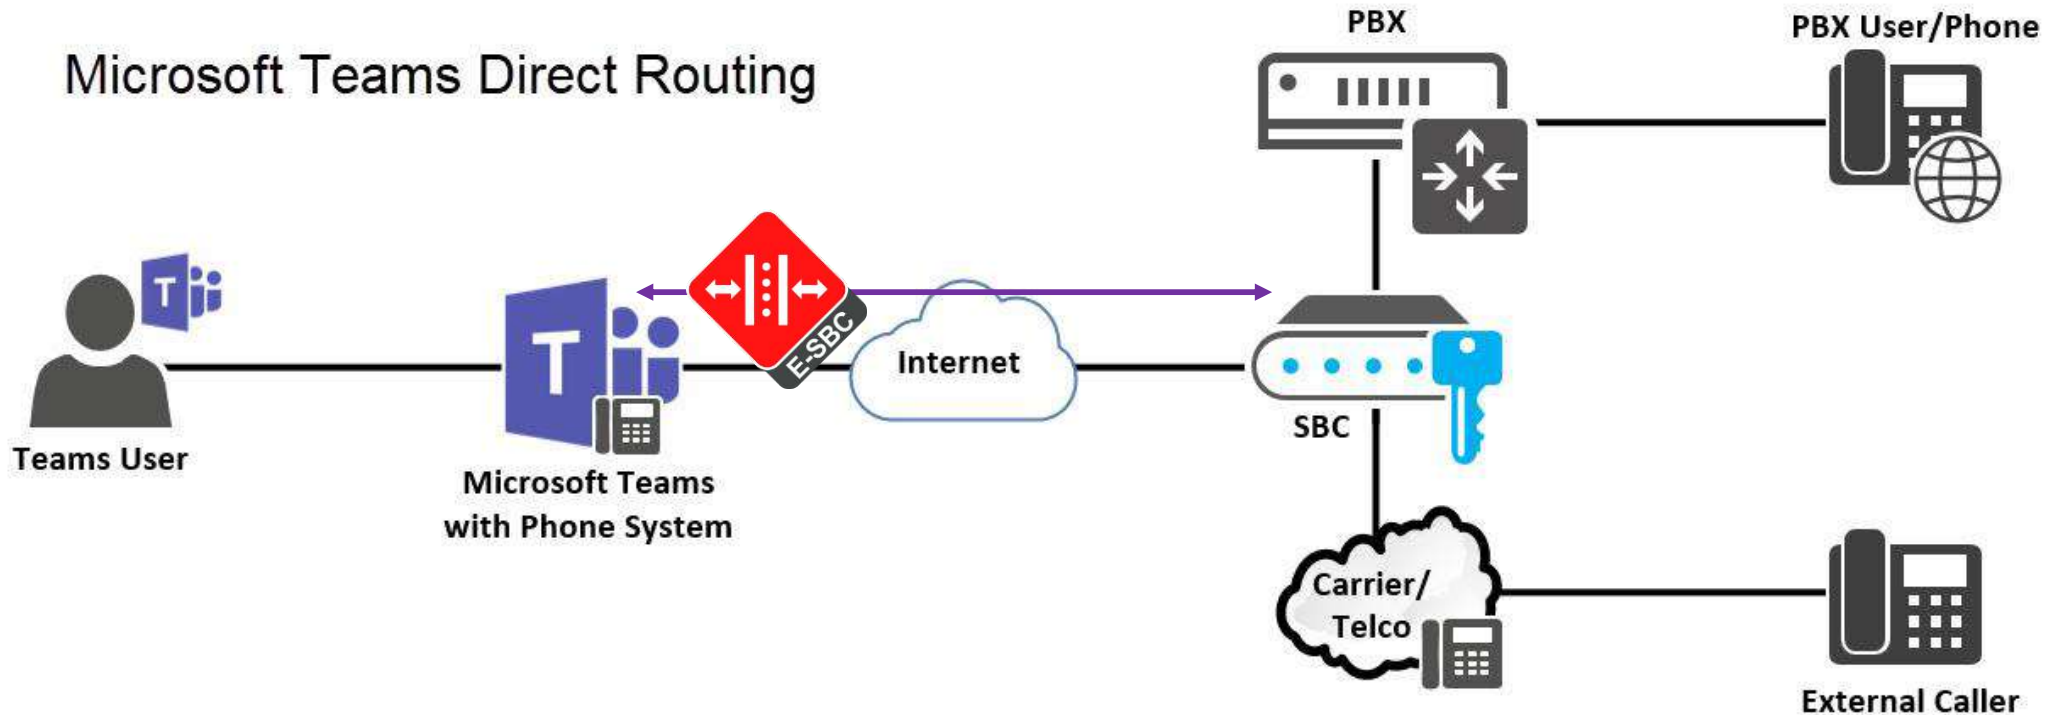

La telefonia in Teams

I servizi telefonici cloud

Teams Direct Routing

Interoperabilità con PBX e accesso alla PSTN

SBC Certificati Microsoft Teams

<https://docs.microsoft.com/en-us/MicrosoftTeams/direct-routing-border-controllers>

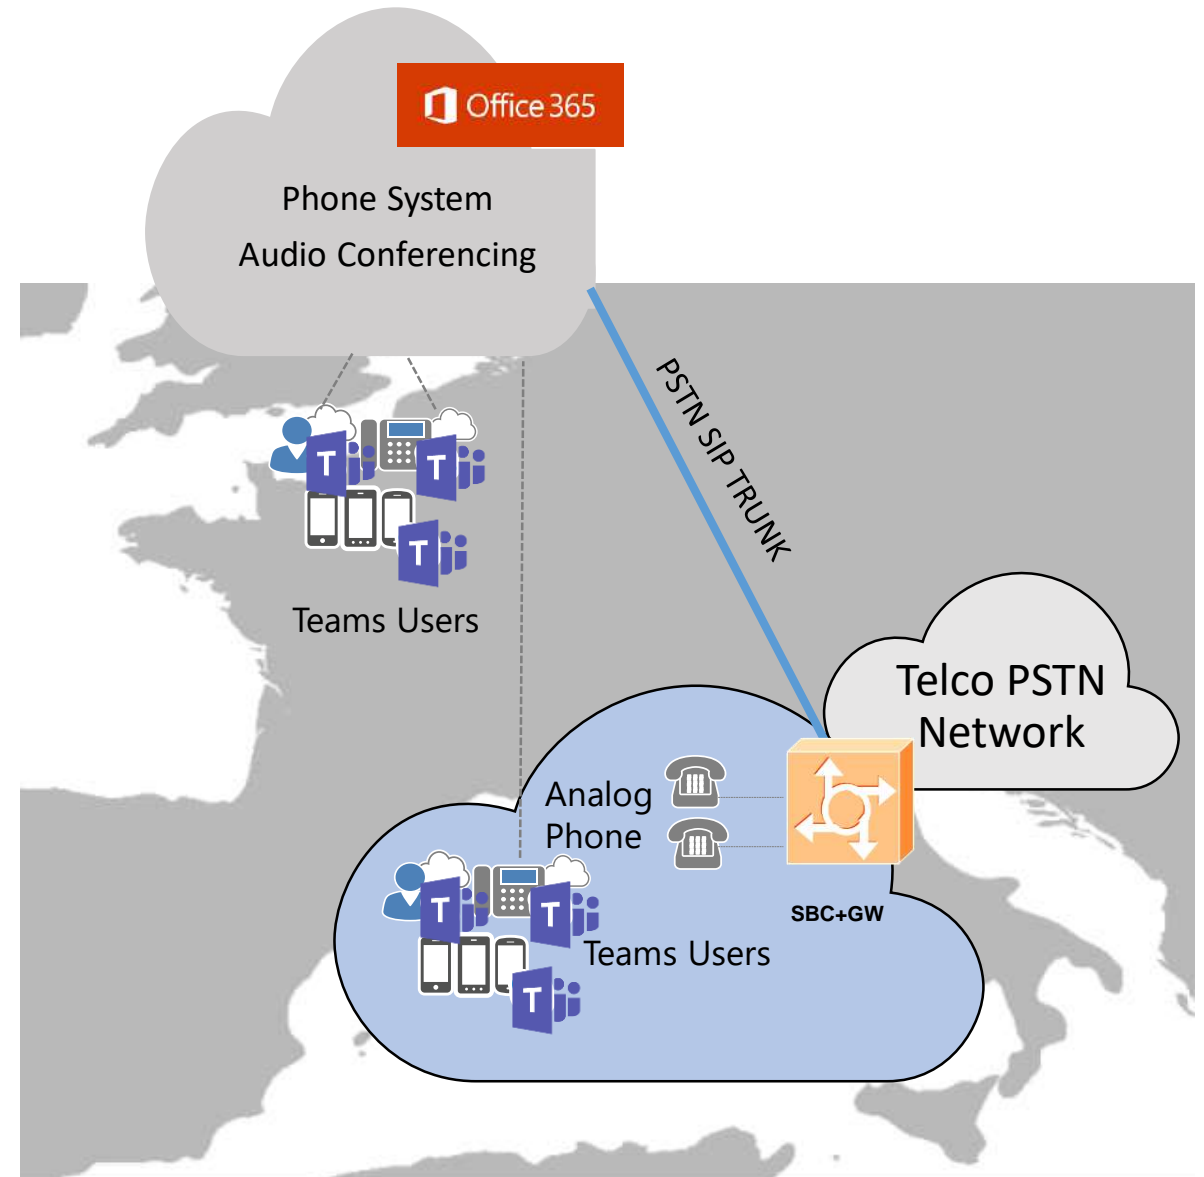

Il Direct Routing permette ai clienti Microsoft Teams di connettere le proprie linee telefoniche direttamente ad Office 365 in modo tale che l'utente possa fare chiamate in ingresso ed uscita dalla piattaforma Teams.

I clienti possono interfacciarsi ai propri service provider attraverso un SBC certificato (Session Border Controller) che termina i SIP trunk

Intelligent Communications Architecture

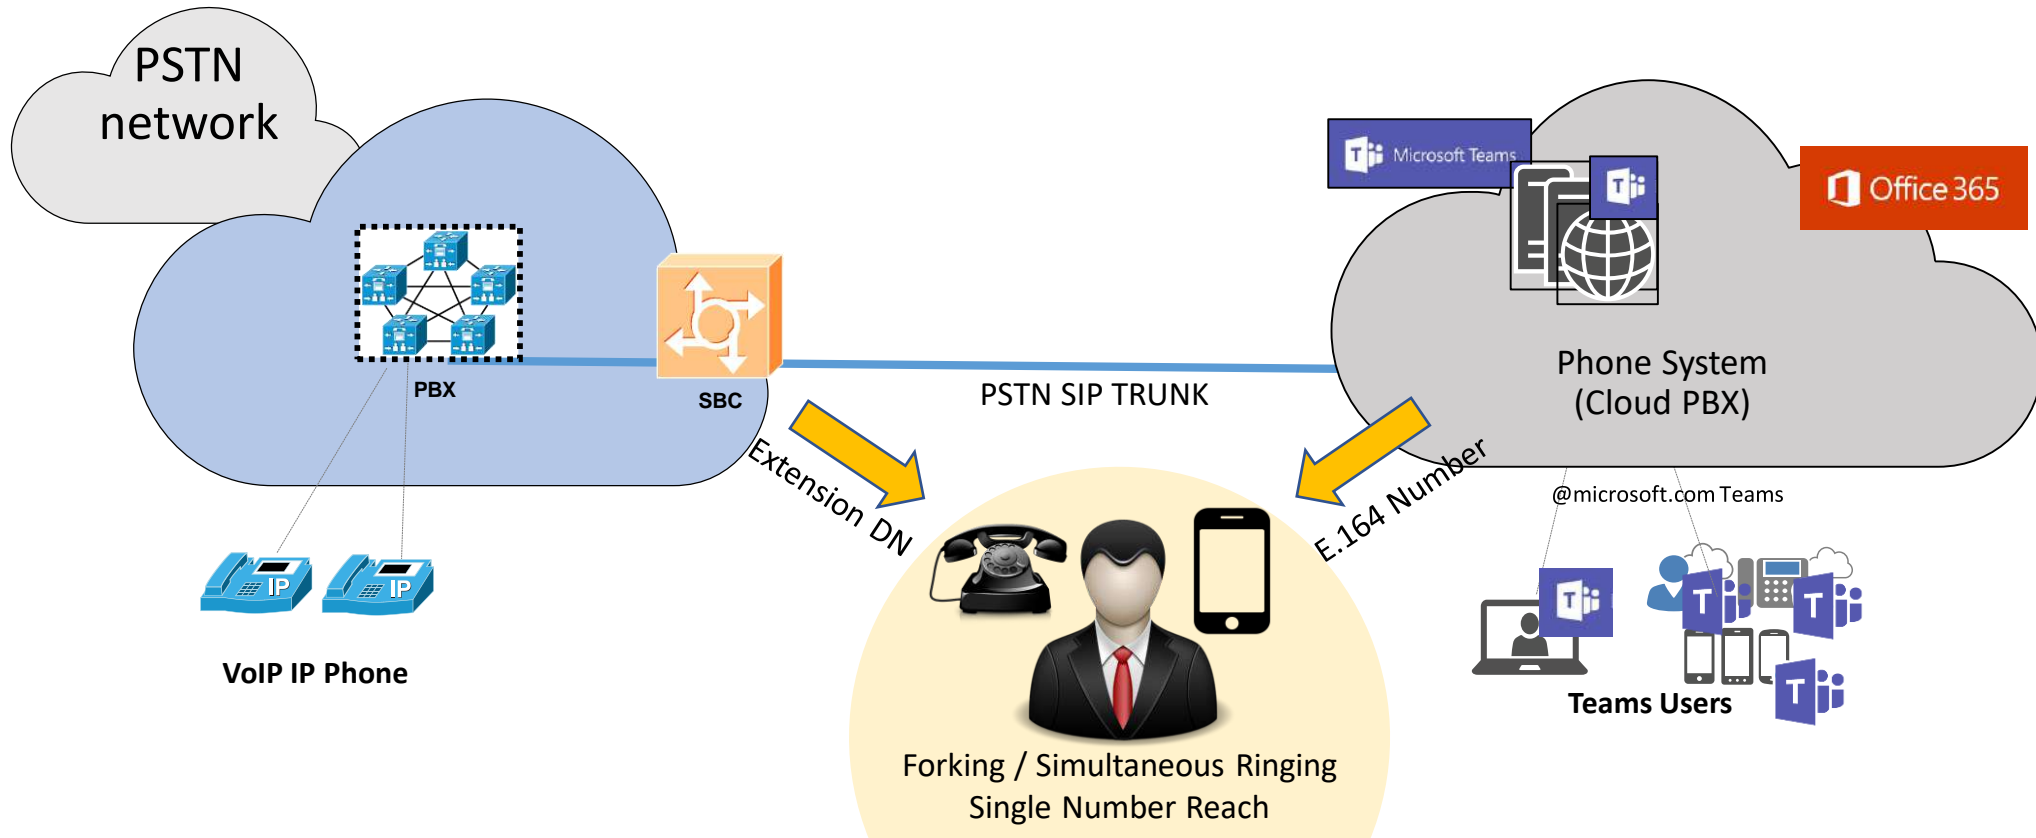

Architecture Highlights

- O365 Phone System + Audio Conferencing
- trunk PSTN del proprio provider PSTN via Direct Routing
- SBC locale per interfacciare sistemi TDM
- Interoperabilità con PBX terze parti via SIP trunk

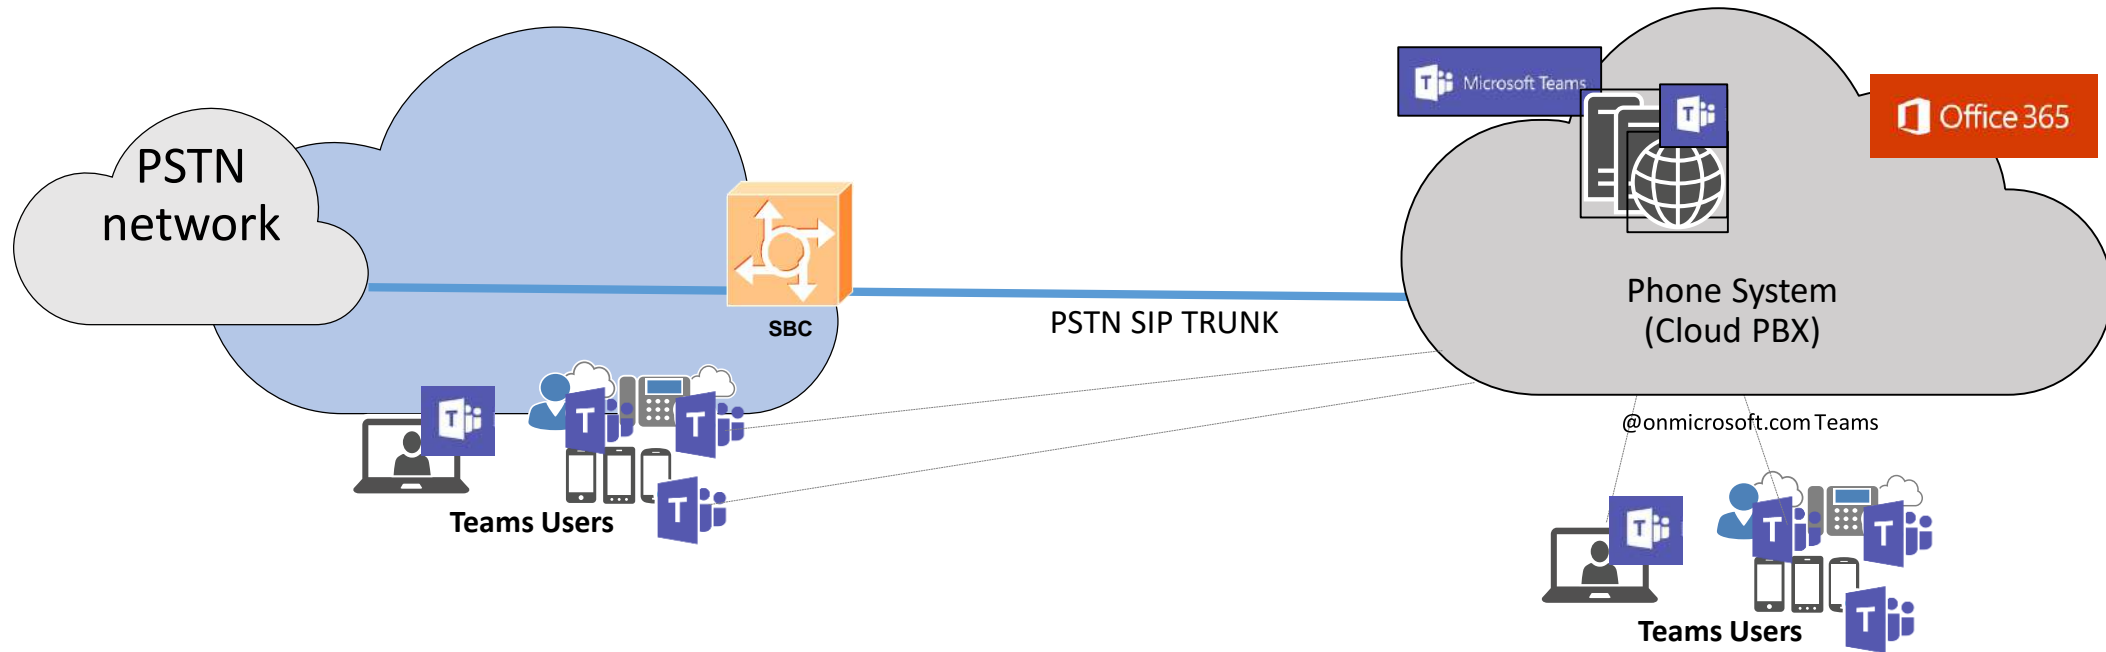

High-level integrated architecture

Integrazione con PaBX VoIP PaBX

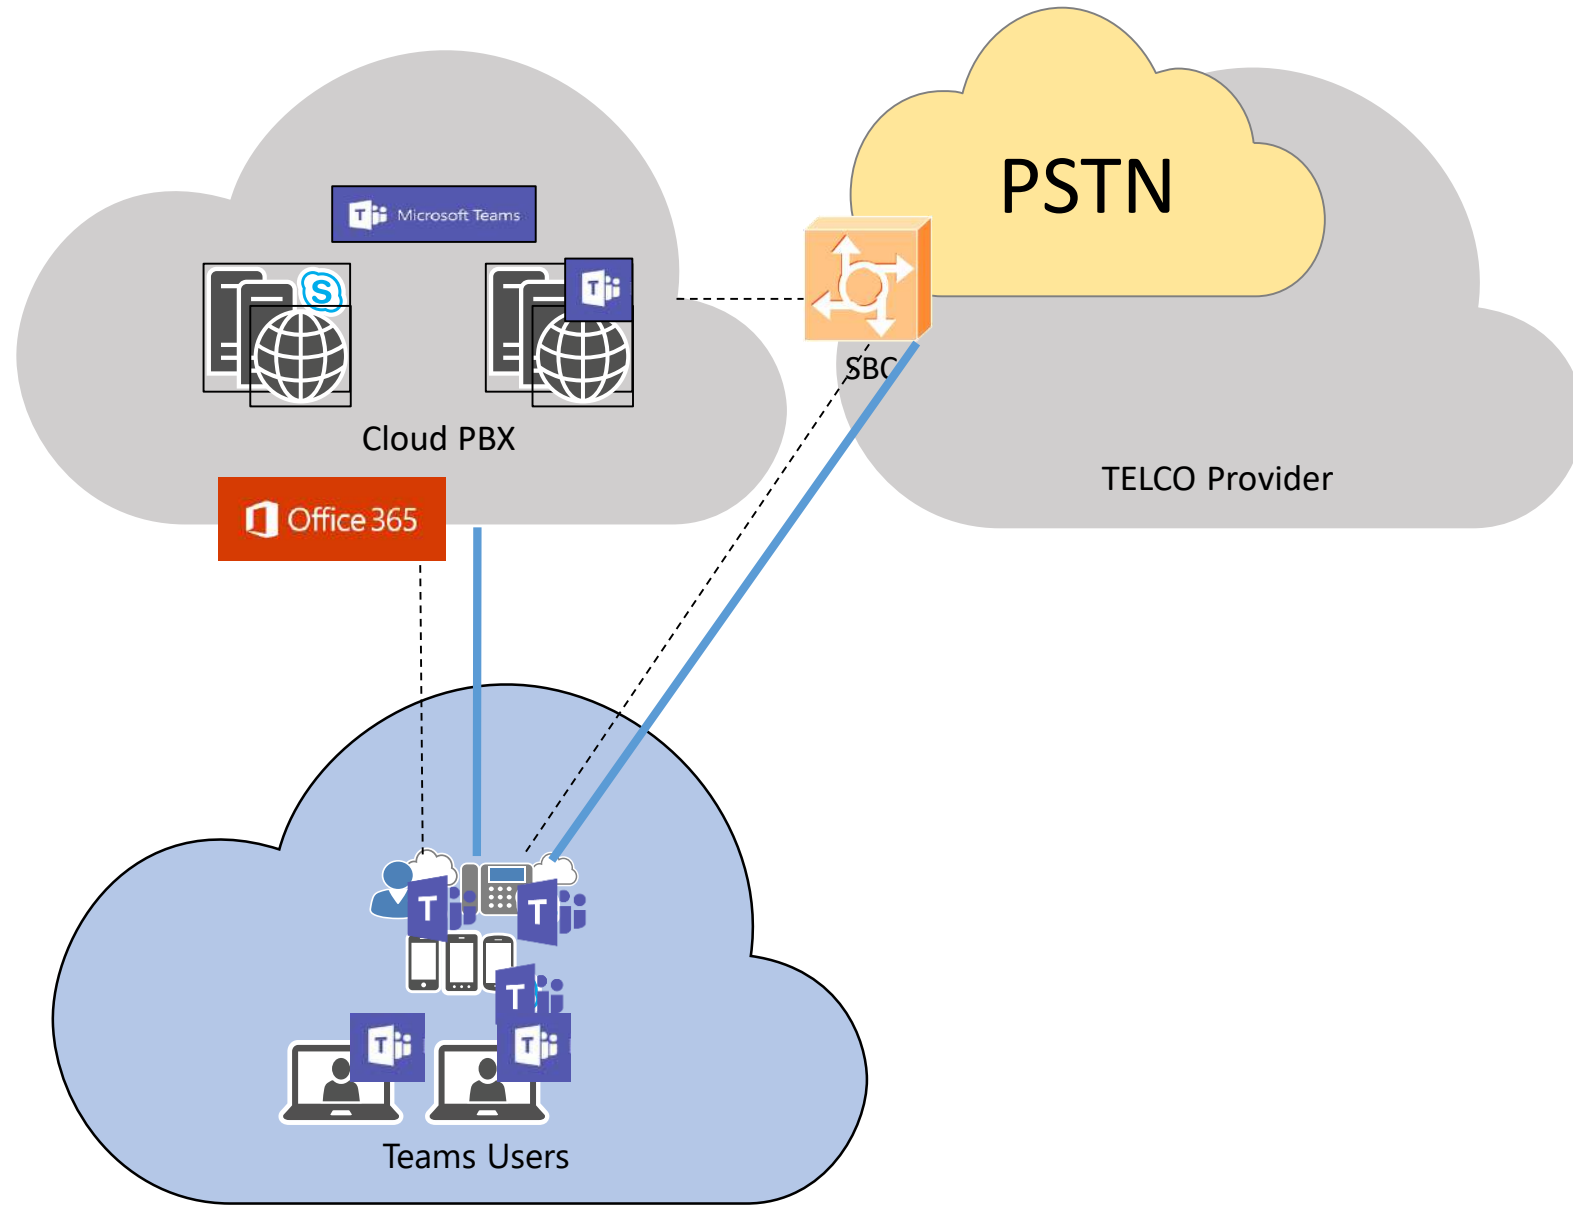

High-level integrated architecture

PaBX full Cloud con Integrazione PSTN locale

High-level integrated architecture

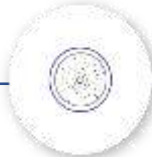

PaBX full Cloud con Integrazione SBC fornita dal Telco Provider

Authentication
Sign in with user credentials/Web Sign-in
Modern Authentication
Phone lock/unlock
Hot Desking Support
Calling
Incoming/Outgoing P2P calls from/to Teams users
In-call controls via UI (Mute/unmute, hold/resume, blind transfer, end call)
PSTN calls
Visual Voicemail
911 support
Calendar and Presence
Calendar Access and Meeting Details
Presence Integration
Exchange Calendar Integration
Contact Picture Integration
Corporate Directory Access
Visual Voicemail
Meetings
One-click Join for Pre-Scheduled Teams Meeting
Meeting Call controls (Mute/unmute, hold/resume, hang up, Add/remove participant)
Meeting Reminders
Add Skype for Business participant to ongoing meeting
Device Update and Management
Device Update
In-band provisioning
QoE & Log Upload
Common Area Phone Support

Interoperabilità con Videoconferenze tradizionali

Cloud Video Interop – Certificato per Microsoft Teams

- HD video (1080p) e Content (VBSS)
- Supporto per apparati videoconferenza H.323 e SIP
- Pianificazione riunioni native in Teams/Exchange
- Soluzioni Cloud basate in Azure, Hosted od On-premise

Soluzioni

Cisco Webex Meetings

Poly RealConnect Service

Pexip Infinity For Microsoft Teams

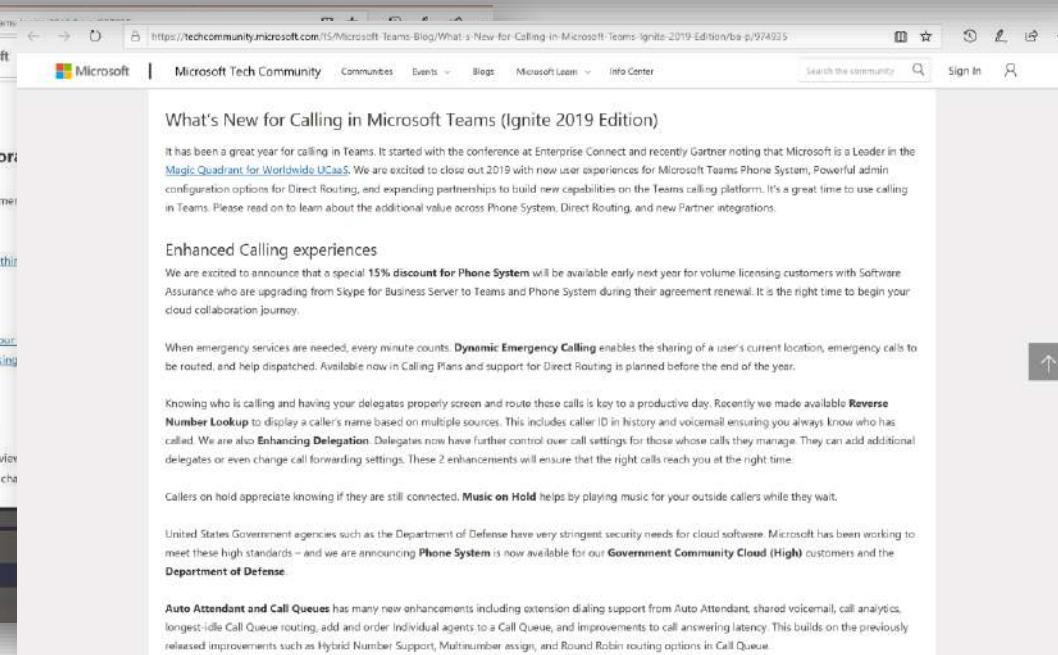

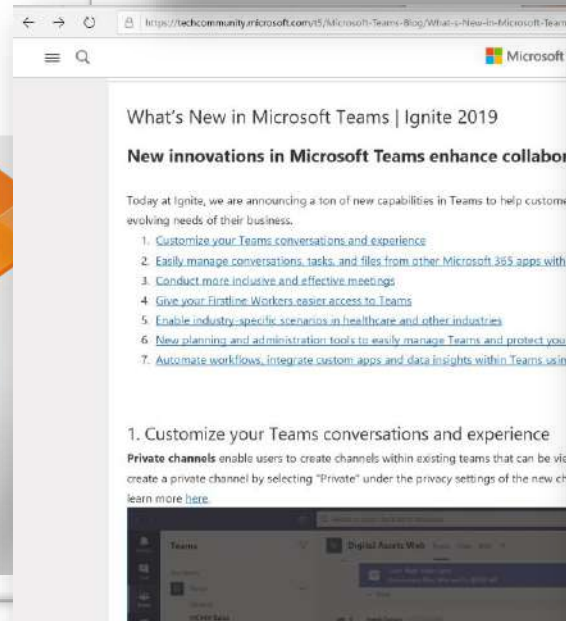

BlueJeans Gateway For Microsoft Teams

News from Ignite

Orlando 4-8 Novembre 2019

Survivability and Call Quality using SD-WAN is top of mind for customers and we could not agree more. This enables dynamic call rerouting to alternate links if the main connection is not available and also improves calls by routing new calls between links based on quality telemetry. We are working with Oracle now to enable SD-WAN solutions such as these for Phone System and Direct Routing. Expect more news early next year.
